CONTENT

A large stack of cut logs is positioned in the middle ground of a sunlit forest. The logs are stacked neatly, showing their natural wood grain and varying diameters. The forest floor is covered in dry leaves and twigs, and the tall, thin trees in the background are bathed in warm, golden light from the sun, which is visible in the upper right corner, creating a lens flare effect.

WE PRODUCE IN HARMONY WITH NATURE

AN ECOLOGICAL & ECO-SUSTAINABLE CHOICE.

Very often the accusation is made that choosing wooden furniture means contributing to deforestation

Quite the opposite: the higher the demand for wood, the higher the number of trees planted And the higher the number of trees present, the lower the rate of pollution or landscape degradation, with significant benefits on human and urban health.

Today there is a phenomenon of reforestation in Western countries, where the green area has increased (especially in Europe, the woods expand each year by about 5,000 km² and almost all the forests are managed precisely to produce wood). Wood renews faster than it needs. Every second 1 cubic meter of wood grows.

Forests represent the green gold of the planet, thanks to their ability to filter the greenhouse gas Co₂ from the air, store carbon, conserve water and soil, and are active in protecting the climate. Similarly, the use of wood as a building material is effective against climate change.

DRESSY KITCHY

Our production proudly 100% Italian Egyptian, is made only of wood, a natural and renewable material among the best for its countless physical-mechanical-biological properties.

Furthermore, for company ethics, all the timber comes only from areas subject to controlled reforestation, according to innovative FSC (Forest Stewardship Council) FSC is an international non-profit Ong founded in 1990 in California with the idea of defining a vision for sustainable forest management through a plurality of rigid parameters (environmental, social and economic sustainability to be respected by the consortium companies).

**OUR JOURNEY
STARTS HERE**

By purchasing wooden furniture, you contribute to the decrease of CO2 in the atmosphere. How?

Wood is found in nature and therefore only needs light, water and air to grow. During growth, the tree removes CO2 from the atmosphere and stores carbon dioxide while releasing oxygen.

Each tree produces an average of 20-30 liters of oxygen per day. As with humans and any other living being, in the growth phase it consumes more and needs more nourishment, consequently young plants produce much more oxygen than old trees. This is why renewing the woods, cutting trees over 30 and planting small ones, helps our planet reduce carbon dioxide emissions.

Who we are

Dressy Kitchy is the story of a manufacturing endeavour where the key players remain the artisans, with their manual skills and know-how, who are able to shape premium materials into forms that stand out for their quality and beauty

Dressy Kitchy designs and manufactures custom-made Dressing Room and kitchens, furniture and lifestyle products for discerning clients around the world.

We unite world-leading design and craftsmanship.

We share a deeply held respect for traditional artisanal techniques and fine natural materials, paired with a passion for excellence in craft and design

We live creativity like never before, crafting your desires and ensuring a valuable, beautiful and well-made solution.

Choose your product, your design, your accessories and your finishes, and create, with the support of our professionals, your unique and different design.

About DK

Italian Soul

A detailed portrait of Leonardo da Vinci, showing him with a long, wavy beard and hair, wearing a green cap and a dark green garment. The background is a blue and white checkered pattern.

Portrait of Leonardo da Vinci
(1452-1519), Italian painter.

Designers

Leonardo da Vinci was a true Renaissance polymath; an extraordinary man with the exceptional ability to draw conclusions from his eternal inquisitiveness. With interests in architecture, music, mathematics, literature, geology, astronomy, botany, paleontology, and cartograph

he's most famed for his work in art, anatomy, engineering, and scientific discoveries and inventions. As one of the most prominent men of his time, current historians accepted Leonardo's work as complete and uncovered—until now.

At Dressy Kitchy, we believe that design is an interactive journey.

We believe in design as a tool for social change that helps to explore and meet the needs of contemporary living.

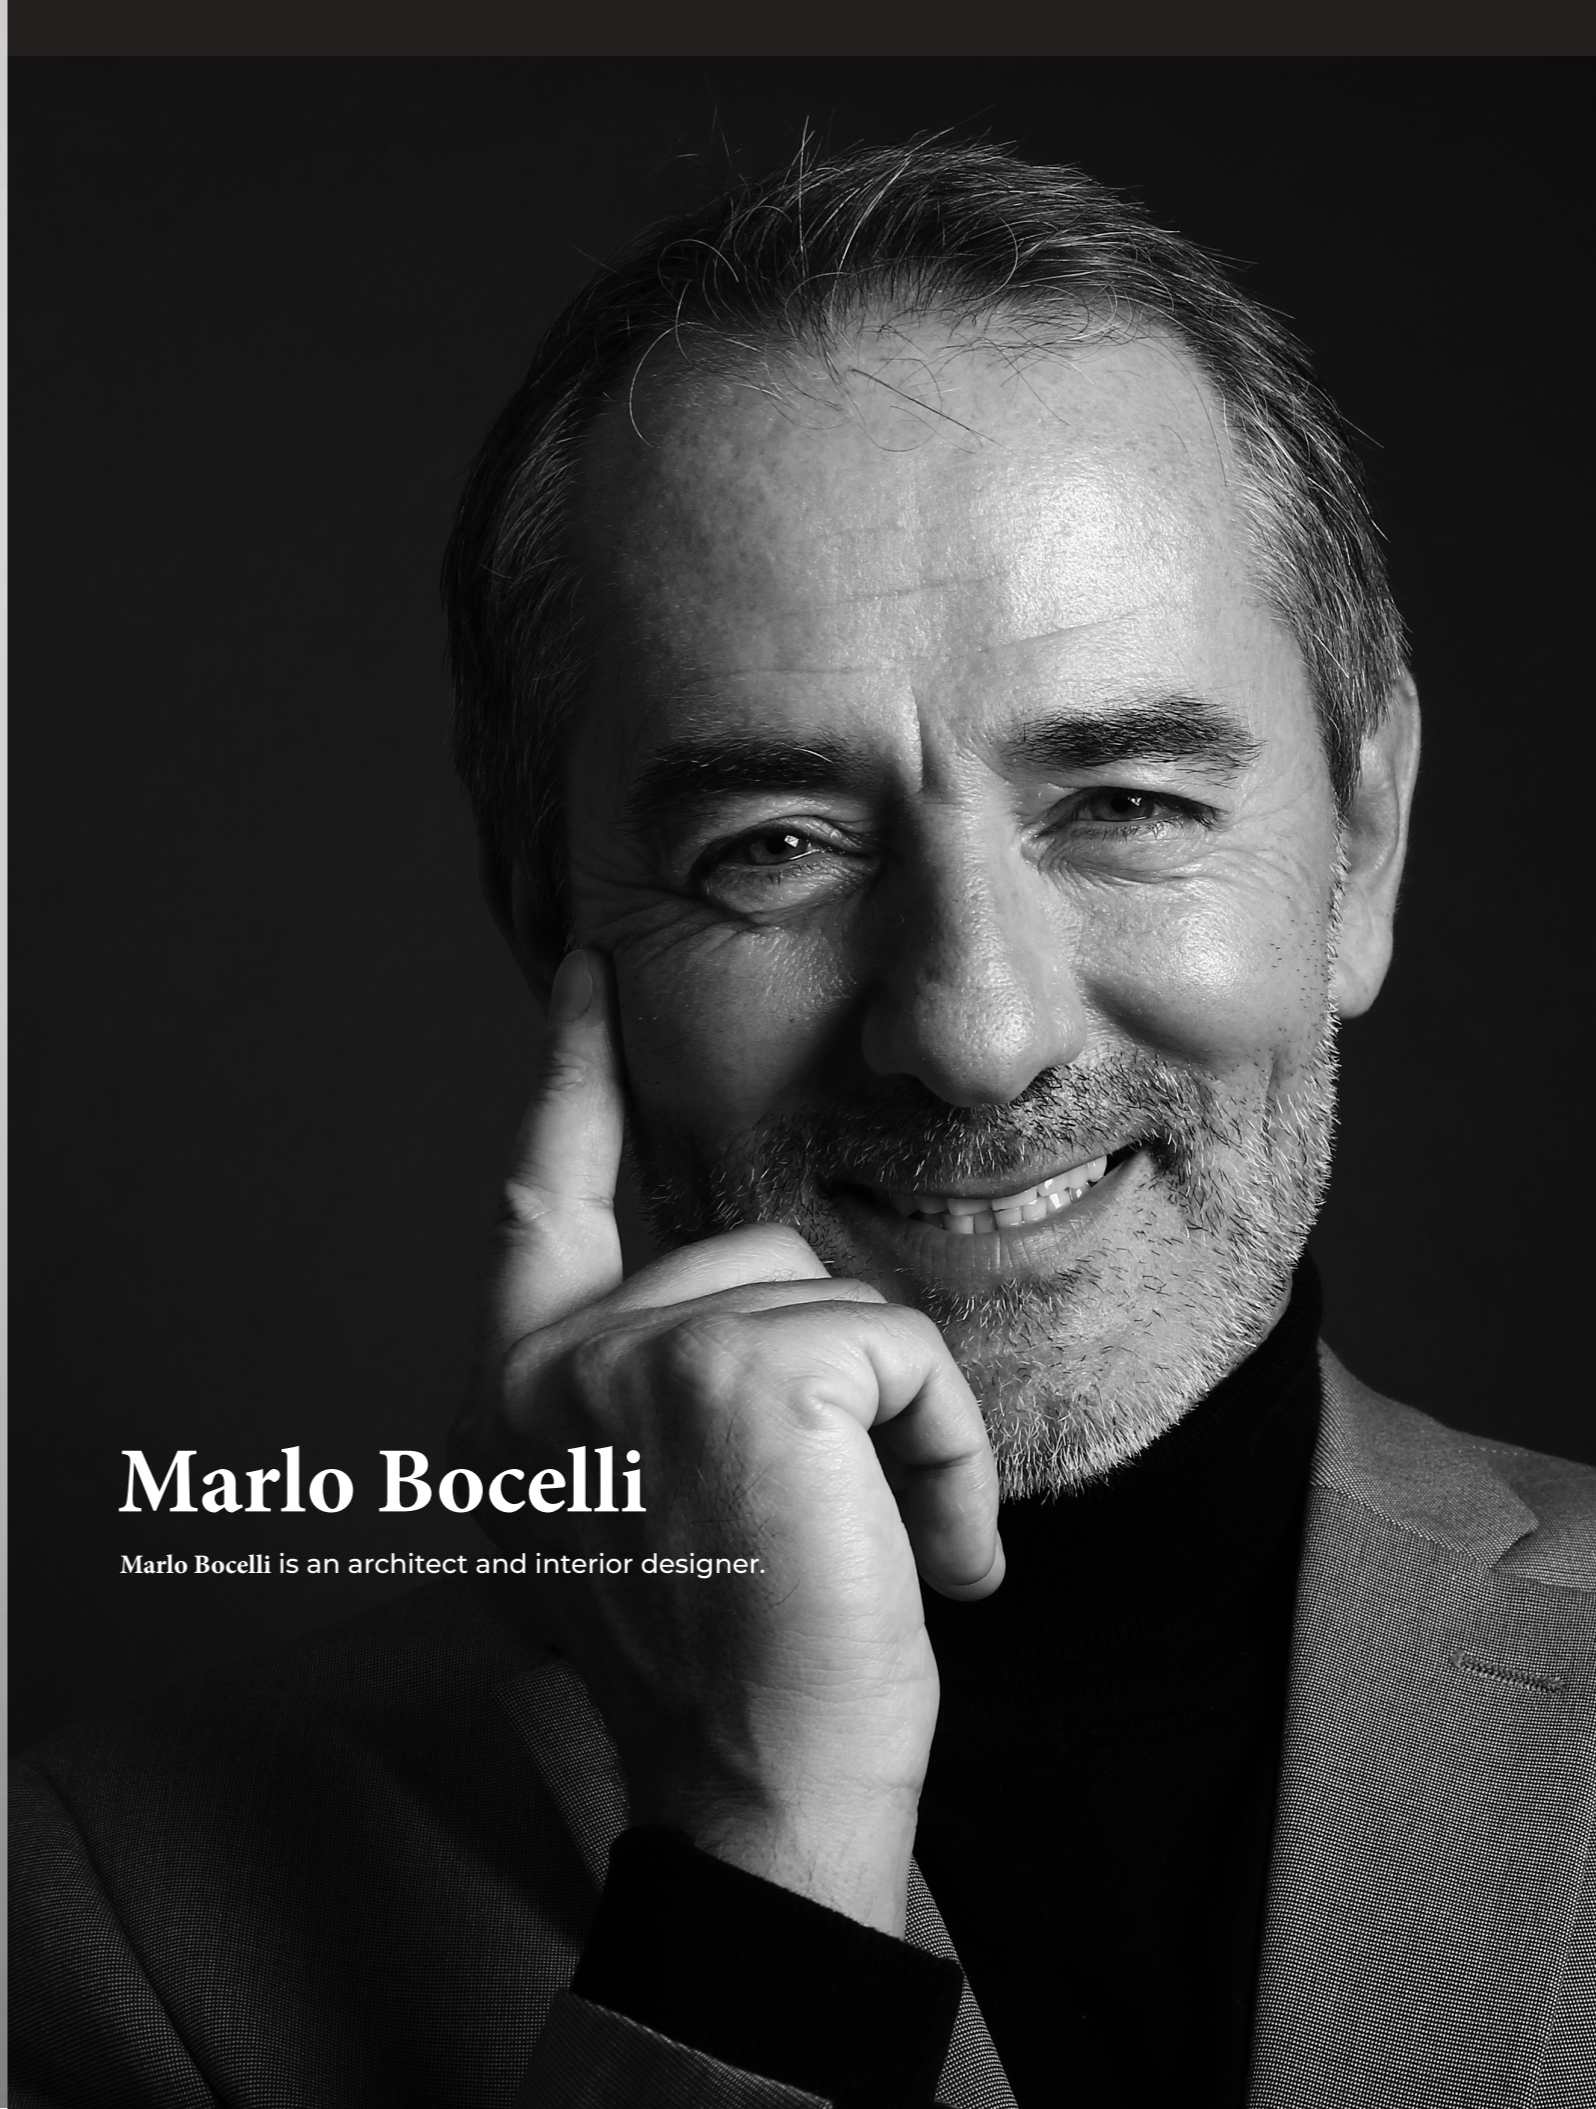

Discover DK local and international artists and designers and their products, exclusively created for the most demanding customers.

WALK-IN CLOSET

WALK-IN CLOSET

Milano walk-in closet represents excellence in design and performance for storage spaces. This modular system was designed to meet different requirements, offering great flexibility in its configuration, which perfectly adapts to any space. Milano stands out for its wide choice of accoutrements, high-quality finishes and an integrated lighting system, creating a superlative user experience. With finishes available in melamine, painted or wood veneer, Milano also comes in versions with an aluminium frame combined with glass, leather or fabric finishes.

Milano

The interior, defined by a variety of drawers, pull-out doors and shelves, allows one to artfully display and organise the wardrobe, shoes and accessories, through the innovative use of glass, which adds visibility while protecting the contents. The finishes, which range from microfibers to a variety of coloured leathers, have been conceived to add a touch of sophistication and personality.

Our Factory

Handcraft and advanced machinery transform raw materials into remarkable works of contemporary design.

Craftsmanship & Innovation

Dressy Kitchy harnesses the beauty of common materials, transforming them through advanced artisanal techniques.

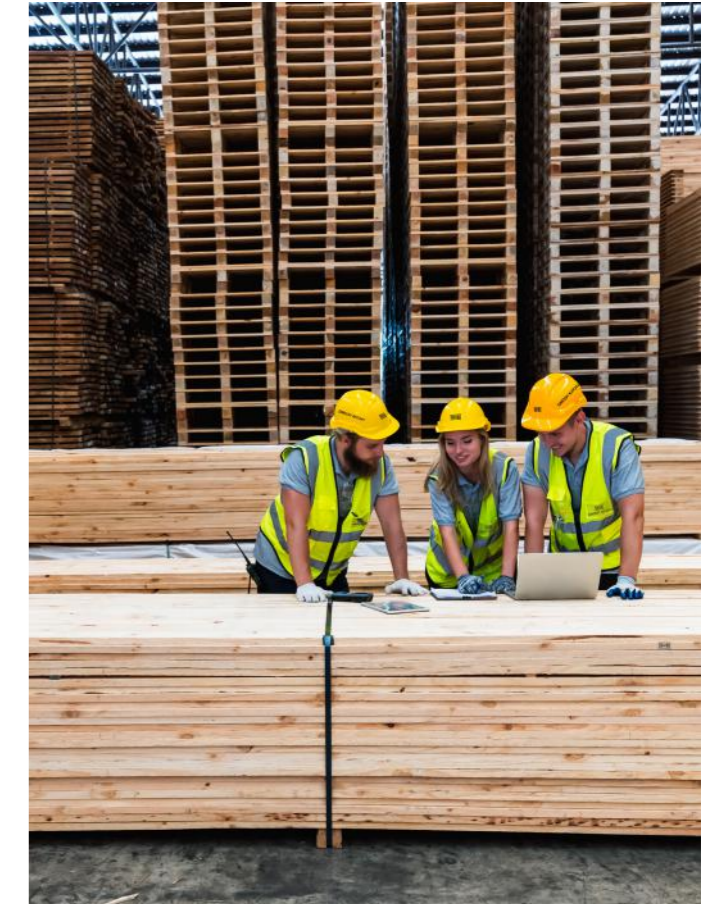

Each DK creation embodies generational craftsmanship expertise, combined with a relentless pursuit of innovation and a passion for design.

The manual component is an essential aspect of our production: attention to detail and the originality of the processes give our products a distinctive and precious touch, made possible only by the skilled hands of our artisans.

Sustainability is an integral part of the values, culture, creativity, technology and entrepreneurship by Dressy Kitchy and cuts across all planning decisions, production and testing.

5,000 square meters of production area

In the 5,000 square meters of production area, in the furniture district of Giza, Egypt, old techniques such as the glossy lacquer Polyester are complemented by cutting-edge techniques in strong continuity with the territory and local traditions.

Tailor-Made Service

DK provides a bespoke furniture creation service. Our technical office is composed of qualified professionals who collaborate with architects and interior designers to develop tailored executive projects.

By fully leveraging the furnishing and finishing options offered by DK, we guarantee products with millimetric precision that meet all customer needs. The DK atelier combines aesthetics, functionality, and craftsmanship to make every product unique and personal.

Library Systems

Awesome System represents the pinnacle of flexibility and elegance in bookcase design. Defined by its minimalist style and coherent lines, Awesome System provides a wide range of configuration options due to the side panels range in height and the multiple widths of shelves and bases.

The system evolution now includes the integration of a TV compartment, desks, drawers and storage units with flap doors, providing innovative solutions for every kind of requirement and style. The carcass is made of high-quality wood, with refined finishes that can fit any space.

Bathroom
design takes
on new
meanings

Bathroom Models

Bathroom design takes on new meanings, far removed from formal rigidity and almost A S E P T I C aesthetics. DK rationally redefines the main functions of the bathroom designing modern and elegant spaces, characterised by fluidity of movement mixed with technologies, materials, shapes, sizes, and combinations.

The goal is a stylistic continuity with the other areas of the home, according to personal taste that goes hand in hand with DK SIGNATURE QUALITY.

A living material and forever.

As a rule of purity desired by DK, the wood used is a Natural material; it does not undergo any chemical treatment and therefore retains all the characteristics that distinguish it, such as small cracks, crevices, knots or color variations that guarantee its authenticity.

WOOD IS A TRULY MAGNIFICENT AND FASCINATING MATERIAL not only for its unique and inimitable aesthetics, but also for its intrinsic qualities, including antiseptic effects (it does not allow bacteria to nest), antistatic (it does not charge electrically, therefore tends to attract less dust) and hygroscopic (absorbs and releases moisture into the air). Also helping to create a pleasant living climate.
